He has attended to a single case of Fistula in Louisville that was certainly a distressing one, which he effectually cured in less than 20 days without giving the patient one moment of pain. Reference is given to Mr. St. John, a respectable mechanic who works with Besj. Hudy, Efg., carpeuter, in the city of Louisville. If it was prudent to do so, he could give references to many cases of secret diseases cured, some of 6 or more years strainling, leaving the patients in good health. He uses no mercury.

SIANUFACTUREES OF PLATFORM STALES,

St. Johnsbury, Vt.

A N RXPERIENCE of twenty years has enabled us of Compound Balances, even when constructed apout of the body shown and remethed by long experience and great practicalskill. Platform malances, which to an inexperienced observer, appear to be exact imitations of our Scales, are niten found when lested to be veryin accurate.

A greatvariety of PLATFORM BALANCENare now officed for sale, and many sre used, which cannot be relied upon for correct weight. In many instances they will not agree with themselves. Merchants who have used them for months, supposing them correct, bave fortunously discovered that a heavyload, when divided and weighed in small drafts, would vary essentially, in the aggregate, from what wasindicated by the same sale when weighed at once. Frequently the same platform will give different weights upon every change of the position of the body weighed. The consequences of these variations are often vexatious, and always involve one partylu pecuniary loss.
